Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bergman (5495863) in view of Morin et al (4556074).

With regard to claims 1-9, Bergman clearly discloses the claimed invention (figs. 1-5, col. 3-col. 5) except for a first and second elongate tines extending outwardly from the bottom of the head of the device, the length of each of the first and second tines being less than the length of the floss extending between the exit and entrance apertures and the entrance and/or exit aperture being tapered. Morin et al discloses a handheld flossing device (fig. 1) comprising a body having a first tine (28) with an exit aperture, a second tine (30) with an entrance aperture, a length of the first and second tines being less than a length of a floss (56) extending between the exit aperture and the entrance aperture (fig. 1). It would have been obvious to one having an ordinary skill in the art at the time the invention was made to employ the first and second tines as taught by Morin et al into the flossing device of Bergman for the intended use purpose. And it would have been obvious to one having an ordinary skill in the art at the time the

Art Unit: 3732

invention was made to construct the entrance and/or exit aperture being tapered, since such a modification would have involved a mere change in the shape of the component.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Arias is cited to show the state of the art with respect to a flossing device.

The drawings filed 08/05/03 have been approved by the Examiner.
